Members of the TIGERS Grants Committee:

Greetings from the Jubilee Center of Hoboken. We would like to voice our support for the Washington Street Rehabilitation Project. Washington Street is the lifeblood of Hoboken, a major commercial and pedestrian thoroughfare where all families from in and around Hoboken can enjoy entertainment, shopping and the outdoors in a safe clean environment. Unfortunately, Hoboken is also an older city, with an infrastructure badly in need of improvement. Further, as the director of a child hood enrichment center the investment in safety is of critical importance to me. Our students who range from five to fourteen years old spend a great deal of time on Washington Street, yet crossing the street is a challenge as is riding a bicycle. The components of this plan that address pedestrian and bicycle safety needs are critical to our town.

Please know that I fully support the Washington Street Redesign Project. The concepts behind it will provide a safer environment that improves the city's infrastructure in a greener environment.

Sincerely,

David Shehigian
Executive Director
